

Grease Guardian®

Reduce the need for grease trap pumping and fixing from outside service companies with convenient on-site maintenance.

Is your grease trap playing hard-to-get? Grease Guardian offers flexibility with in-house food and grease management for hard-to-reach locations.

Compact and easy to use, the Grease Guardian automatically traps and removes grease while filtering solid food waste. Staff training and after-sales support make on-site food and grease management easy, with design and quality workmanship that saves you the hassle of pumping or fixing down the road.

The Benefits

- Quality design and workmanship with unmatched warranty
- Unlimited grease-removal capacity, small overall footprint
- Odour-Guard protection
- Compact and easy-to-use automated process
- Expertise for sizing, installation, staff training and after-sales support
- Collected waste can be recycled

Walker is the exclusive Canadian distributor of Grease Guardian.

Building a sustainable future, **together.**

Tens of thousands of installations across the globe, designed to adapt to each kitchen's unique maintenance program and built to last for years of trouble-free operation.

How it works:

Grease Guardian's convenient system collects wastewater from the kitchen, straining unwanted solids and automatically trapping grease, allowing clear water to leave the machine and enter the drainage system. Solids are removed with a removable dry strainer while the grease is liquefied, skimmed and lifted into an external container for recycling.

FOUR-STAGE OPERATION SYSTEM

STAGE 1

Solids Collection

Removable strainer basket collects any solid debris.

STAGE 2

Grease & Oil Separation

Grease is trapped while the clear water leaves the unit and enters the drainage system.

STAGE 3

Self Cleaning & Grease Removal

The PLC programmed heating element is activated to liquefy grease for removal and recycling.

STAGE 4 OPTIONAL FEATURE

Automatic Spray System

An automatic spray system activates to clean unit.
